About JKLU

Established in 2011, JK LakshmiPat University (JKLU) is located in the historic city of Jaipur, Rajasthan. Supported by the 125 years old legacy of contributions to nation building by the JK Group, at JKLU we are passionate about building the country's most innovative higher education institution. The 30-acre campus is a modern, environmentally conscious and inviting space designed to help students live, work and play in a setting that is safe, productive and student-centric. As the world of business and jobs changes rapidly, we are evolving to make our students not just job ready but also life ready, to help them see learning as a continuous process and to become future-ready professionals with 21st-century skills.

About Learning Resource Centre (LRC)

The aim of the LRC is to serve the needs of the Faculty, Research Scholars, Students and External Members. It is the heart of the University and acts as a centre for the collection of literature predominantly related to management, engineering and technology and its allied subjects and develops a comprehensive collection of information that is useful for teaching and reference purposes. User satisfaction is the prime objective of LRC services. Library is situated in a multi-story building with growing collection of Books, Journals and other reading materials.

About RTLA

Established in 2010, with its headquarter at Jaipur and registered under the Rajasthan Non-Trading Company Act, 1960. The Main objective of RTLA is to provide a common platform to library professionals for the exchange of latest updates, sharing new knowledge and improve the quality of Library and Information Centers along with strengthening the welfare of Library Professionals. The RTLA is dedicated for holistic development of library profession and therefore very often various events like seminars, thought-provoking discussions and brains storming sessions for insights to conceptualize innovative research proposals have been usual activities under the banner of association. The association also frequently strives to organize invited lectures, workshops for professionals and students on contemporary advancements of library sciences.

About the Seminar

Libraries aim to facilitate knowledge resources to the community and play a vital role in spreading education by self-learning process. Presently these facilitation centres are facing problems of limited financial resources and underutilization of available resources. The challenges are real, complex and varied with organization, place and community. To cater the need of rapidly evolving and changing information and user community, libraries have to search answers in a new perspective by using cutting edge technologies and innovative approaches. Hence, libraries are continuously reframing themselves and focusing more on services in comparison to resources. To create innovative services design thinking approach will be helpful. Design thinking is a systematic approach to solve complex problems. This approach goes beyond traditional concerns. User needs and satisfaction is the central key to this approach. It has three essential components i.e. technical feasibility, economic viability and human desirability. It involves three steps process :- **Inspiration** – Identifying your challenge and deciding how to approach it, **Ideation** – Generating ideas, then interpreting and expressing them through prototypes, and **Iteration** – Experimenting and soliciting user feedback to improve your prototypes.

Objective

- Recognize the present and future challenges in library and information services.
- Exposing librarians to design thinking approach for problem identification, visualizing, reframing and solution.
